

**REMARKS****Status of the Claims**

In this response, Applicants cancelled claims 28-54 and amended claims 55, 57-59, 62-66, 69-76 and 79-80 to more clearly recite the claimed invention and to conform with the laws under US patent practice.

**Restriction Requirement**

In response to the restriction requirement set forth in the Office Action mailed March 14, 2007, Applicants hereby provisionally elect Group II, claims 28-80 for examination, with traverse.

Applicants believe that the claims of the remaining group (Group I) are sufficiently related to be examined together, and that such examination would not place an undue burden on the Examiner. M.P.E.P. § 803 states that, if “the search and examination of an entire application can be made without serious burden, [then] the examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.” Therefore, applicants request that the examiner reconsider her position regarding this restriction requirement and examine the claims of Groups I-II as one invention.

In addition, applicants note that a restriction has been required between claims directed to a product and to a process of using the product. Applicants respectfully request rejoinder of the related methods of treatment claims should the composition claims be found allowable. M.P.E.P. 821.04(b).

In addition, a species election has been required, requiring election of a species directed to a specific disease for treatment according to the pending method claims. Applicants elect rheumatoid arthritis as the specific disease. The examiner, however, is reminded to follow the procedure in M.P.E.P. 803.02 and extend the search to the other species recited in the claims, should the elected species be free of the prior art.

Applicant reserves the right to file divisional applications covering the subject matter of the non-elected claims.
